Benefits

Hospital Confinement Benefit Amount: \$_____ per confinement

We will pay this benefit if any covered person incurs charges for and is confined due to a covered accident or covered sickness. The confinement to a hospital must begin while the policy is in force. We will pay this benefit once per confinement. If a covered person is confined and is discharged and confined again for the same or related condition within 90 days of discharge, we will treat this later confinement as a continuation of the previous confinement. If more than 90 days have passed between the periods of hospital confinement, we will treat this later confinement as a new and separate confinement.

Outpatient Surgical Procedure Benefit

Tier 1 Surgical Procedures \$_____ per covered procedure

Tier 2 Surgical Procedures \$_____ per covered procedure

Calendar Year Maximum \$_____ per covered person for all covered surgical procedures combined

We will pay this benefit if any covered person incurs charges for and requires a surgical procedure due to a covered accident or covered sickness, and he is not confined in a hospital at the time of the procedure. The procedure must be performed by a doctor in a hospital or ambulatory surgical center. We will pay this benefit once per covered outpatient surgical procedure. We will pay this benefit for only one outpatient surgical procedure performed at the same time even if caused by more than one accident or sickness. In that event, we will pay the benefit that has the highest dollar value. The surgical procedure must occur while the policy is in force.

Ambulatory Surgical Center means a place which:

- is equipped for surgical procedures performed by qualified physicians;
- provides anesthesia administered by a licensed anesthesiologist or licensed nurse anesthetist; and
- has written agreements with local hospitals to immediately accept patients who develop complications.

To determine the amount payable for a surgical procedure, locate the procedure in one of the tiers shown in the Surgical Schedule below and refer to the benefit amount on the Policy Schedule for the tier in which the procedure

appears. If the specific procedure is not listed in the Surgical Schedule, we will use the Current Procedural Terminology (CPT) Code provided by the covered person's doctor and a current relative value scale to determine the tier of the procedure. We will pay for only one surgical procedure for the same covered accident or covered sickness in a 90-day time period. If a covered person receives a subsequent surgical procedure for the same covered accident or same covered sickness, we will pay an additional benefit only if the subsequent procedure was performed more than 90 days after the last covered procedure was performed. We will pay no more than the Calendar Year Maximum for the Outpatient Surgical Procedure Benefit shown. If any covered person has an outpatient surgical procedure and is confined as a result of complications from the surgery within 90 days following the surgery, we will pay only the Hospital Confinement Benefit and not pay the Outpatient Surgical Procedure Benefit.
